3855-1021-0178

Amend contract [redacted]
(Vo. No. 62-100,270) to provide
for the incorporation of Option 2
into basic unit per proposal
dated 3 Oct 1962 attached. (Option
2 calls for the modification of the
output circuits to feed a Dataphone
202B half-duplex and includes
additional circuitry for driving a
typewriter in the same manner as
the earlier RIC/1's.) The logic
system in this unit must be
transistorized throughout.
